

Worksheet② The History of UD

Fill in the empty blanks below.

Name _____ Answer _____

- Normalization is an idea of thinking to guarantee life and the right of the person with a disability, and it is put forward by Bank-Mikkelesen in Denmark in the 1950's. This idea was a thought to fix the condition to make people with disabilities have a normal life in the general public with the ordinary people by not having special supports.
- The first concept of universal design was born in the United States. The government had established The ADA method and did a hard work, but was not going well. Thereupon, Dr. Ronald had thought of the thought of "UD".
- The concept of UD had spread in Japan in about the 1980s. The E&C Project in 1991 had made the ideas of items and services for a common use in Japan. Laws and ordinances were made by the government, and one example is the new-barrier free law which was made in 2006.

Today, many Japanese organizations and companies are coping with UD. Search of what kind of groups are doing what kinds of tackle to achieve the thought of UD, and write it down.

Plastic Bottles which are sold by companies that sells cooling drinks

→These bottles are contrived that people who has low power can hold too.
